DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

Claims 1-59 are allowable over the prior art of record because none of the prior art whether taken singularly or in combination to teach **the claimed combination of an sensing apparatus to adapted to isolated vertical forces from non-vertical forces and a method of sensing recited in the specific claimed combination** such require as: "...the lever connectable with the seat along the bifurcated portion and pivotable about the pivot in response to forces applied to the seat, the sensor limiting the relative movement of the lever with respect to the base and capable of detecting the relative movement of the lever with respect to the base to sense the weight of the occupant, the lever configured to resist bending about an axis parallel to the pivot." (claim 1); "...the second portion configured....to limit the relative movement of the levers with respect to the base." (claim 18); "...the first lever configured to resist bendingthe sensor limiting the relative movement of the lever with respect to the base and capable of detecting the relative movement of the lever with respect to the base due to forces on the seat." (claim 22); "...isolating the horizontal force component...measuring the summed vertical load." (claim 26); "...the pivot intersecting the first portion and the second portion...detecting the relative movement of the lever with respect to the base to sense the weight of the occupant." (claim 27); "... a linkage adapted to connect the load-bearing platform to the lever, the linkage coupled to the lever and pivotable about at least a second axis, the second axis being substantially perpendicular to the first

axis..." (claim 34). The prior art of record discloses base plate mounted on the floor of vehicle with supporting in pivotally including lower lever portion having bifurcated and sensor therein for driving the mechanism, which concern for safety device (for example in U.S. 6318208). The rest prior art of record disclose the safety by a pre-tension of the seat belt adjusted to the weight. Thus, the prior art of record do not disclose the limitations recited in the claimed combination as set forth above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
